# Quidelopp Soft

# Orchestra – Ticket kiosk  Q-Select 18

## User case
Q-Select 18 is a modern and compact ticket kiosk for wall or table mount, fully compatible with the Orchestra and Quickflow CJM software.

As entry point for a customer journey the kiosk provides full functionality, depending on how the kiosk is equipped (NFC-reader, integrated camera, …).

The built-in computer is designed to be powerful enough for running all Orchestra and Quickflow software modules needed, including qAgent for Orchestra Distributed Operations.

Many Orchestra clients prefer to have printer equipment for standard ticket rolls, therefore Q-Select 21 has a standard 80mm ticket printer integrated.

For wall mount deployment, the square bottom plate is removed.

## Functionality – specification
The basic version of Q-select 18 has a 18" touch screen, a 80 mm ticket printer and an integrated Linux OS computer. Reader for NFC-card as well as camera are optional.

- 18" vertical touch screen
- 80 mm ticket printer (Masung)
- Built-in computer
  - Processor i5-7400 (four cores, four threads)
  - 6 MB CacheRAM, 8 GB RAM, 500 GB HDD
  - RJ45 & WiFi Ethernet interfaces
  - Linux OS
  - Software package for compatibility with Orchestra and/or Quickflow
- NFC-card reader (optional)
- Camera (optional)
- Overall height 52 cm
- Net weight 6 Kg

The software package included (Linux OS, remote access software plus Orchestra compatibility modules) is licensed for each individual kiosk.

As standard, Q-Select 18 is available in black or white color. For batches of five (5) kiosks or more the color can be customized.

Q-Select 18 complies with European Union requirements and is CE marked.
